

Before we begin, I want to let you know how I document consultations. I use Note Dr, an AI-powered tool that securely converts our conversation into clinical notes. This means less paperwork and more focus on your care.

Your privacy is my priority. Note Dr has strict security measures to ensure your information is used only for accurate medical documentation.

Your consent matters. If you have any questions, I'm happy to discuss them.

What You Should Know About Note Dr

 **Privacy First** – Note Dr deletes audio recordings as your session takes place. Your data remains yours, always.

 **Secure & Encrypted** – Built with advanced encryption, ensuring your information is always protected.

 **Anonymised Data** – Patient identifiable information like names, dates of birth, or addresses is anonymised, so only I can see this information.

 **More Time for You** – Note Dr automates documentation, so I can focus 100% on your care.

Your Rights

✓ Your consent is voluntary – You can discuss any concerns with me and choose not to use Note Dr if you prefer.

✓ Note Dr supports but does not replace my clinical judgment.

Consent Acknowledgment

By signing below, you acknowledge that:

- You have been informed about Note Dr and its purpose.
- You understand how your information will be handled, stored, and protected.
- You agree to allow me to use Note Dr to assist with documenting your consultation.
- You understand that you can withdraw your consent at any time without affecting the quality of care you receive.
